

1) K-Love serves me as a resident of the local community by nourishing my wounded soul as well as my children and my husband. K-Love fills a very needed void in the world today. They reach the human heart.

2) The local community would be in dire straits without K-Love.

There are too many hurting people and they need someplace they can turn to to find comfort. No pop rock or hip-hop station can provide that. Most of the music on secular programming is vile and not fit for people to hear. Most secular music sends messages of violence and unsafe and immoral sexual practices.

3) K-Love stations are in the public interest because it offers clean programming. Programming that I can trust when my children are listening. It is horrible that any given secular station can

use foul language and sexual suggestions without any consequences.

It is in the best interest of the children of the community to have clean radio programming made available to them.
